basic markdown

Paperflow Test Suite

November 2026

1 Engineering Project Overview

Author: Lead Architect Date: November 2026

1.1 Introduction

Modern technical documentation requires rapid conversion from plain text formats into publication-grade documents. Markdown has become the standard for developer notes, architecture proposals, and scientific documentation.

1.1.1 Core Objectives

The objectives of this project are:

- Provide seamless authoring with monospaced editing and instant previews.
- Render mathematical formulas natively without rasterization or pixel degradation.
- Supply multiple publication presets such as Academic Notes, Technical Documentation, Minimal Editorial, and Two-Column Research Paper.
- Ensure document privacy by storing working drafts locally in browser IndexedDB.

1.1.2 Editorial Guidelines

> *"Typography is the craft of endowing human language with a durable visual form, and thus with an independent existence." — Robert Bringhurst*

Numbered tasks for release:

1. Setup Pandoc and Typst conversion pipelines.
2. Construct reactive split-pane interface with responsive collapse.
3. Validate typography across mobile, tablet, and desktop viewports.
4. Export vector PDFs and verify text selectability.

Inline formatting checks: **bold text**, *italic text*, `inline code`, and ~~strikethrough~~.
